Albany Law School Wins

ALBANY LAW SCHOOL

Albany Law School, the nation's oldest independent school of law, founded in 1851, has played an important role in the development of legal education in the United States. Albany Law is located in one of the nation's most influential states, known for its beautiful campus and the timeless architecture in their buildings.

When Brian Laplant, director of facilities, was tasked with brightening the appearance of the main building he knew he would need to hire a contractor that would pay attention to detail. The building is historic in nature requiring caution to ensure that nothing is damaged. The windows would need to be taped off and special cleaners would be used to remove years of grime and stains. Americlean came in using special cleaners made specifically for limestone and carefully pressure washed the exterior of the building. Some of the stains were very stubborn requiring several cleanings. Once the restoration was complete a special environmentally safe sealant was applied to the limestone and all of the wooden window trim was repaired, caulked and painted. Brian in the meantime, who is a Naval Reservist, was called to duty and Mark De Anglo took over his responsibilities. Mark stated "Working with Americlean made taking over management of the project an easy transition and they did an exceptional job. The main building looks like it got a face lift and everyone comments how beautiful the building looks."

CHALLENGE

Restoring the historic main building made of limestone on the campus of Albany Law School

SOLUTION

Removing grime, dirt and stains from building and flaking paint from window trim. Painting window trim and sealing limestone with special preservation coating

RESULTS

Exterior of building received a face lift and was restored to its original color

Commercial and Industrial Services Include:

Painting / Cleaning / Pressure Washing / Kitchen Exhaust System Cleaning / Epoxy Floors / HVAC Duct Cleaning
