Albany

Marriott

Wins

The Albany Marriott provides the perfect location in Albany and caters to business travelers such as General Electric, Bank of America, Verizon and the ever growing Tech Valley. The restaurant and lounge serve an excellent variety of cuisine. Robert Deja, the Director of Facilities, is highly committed to maintaining a comfortable and safe environment for the guests. When Robert needed a professional company to come in and give the kitchen equipment a thorough cleaning he did not hesitate to call Americlean. Americlean has the area's only certified kitchen equipment inspector, cleaner and trainer on staff. A complete inspection of the system took place and Robert could not wait for the cleaning crew to get started. The crew used non-caustic degreasers, pressure washers, scrapers and a professional containment system to take the equipment down to bare metal standards, which are required by insurance companies and fire marshals. "The results were amazing!" Robert said. "I am so impressed I plan to utilize all of Americlean's services moving forward."

CHALLENGE	SOLUTION	RESULTS
Inspection and thorough cleaning of commercial kitchen equipment to meet Food Service Industry Standards	Area's only certified professional kitchen equipment inspector and trainer conducted an inspection and designed a cleaning system	Complete cleaning of kitchen equipment down to bare metal standards which are required by insurance companies and fire marshals
