Green Mountain Coffee Brews

In a continuous effort to exceed Food Service Industry

Standards Bill Rutkowski, Facilities Project Manager, wanted to clean the entire interior of the "Green Bean Warehouse". The Green Bean Warehouse is home to stacks and stacks of 150 lb bags of raw coffee beans from all over the world. Bill met with Mark Miller, the president of Americlean, to assess the project. The project would need to be completed in such a way as to not interrupt the flow of production, impede the workers and give the cleaning crew the space they needed to complete their job. The plan was borne and Americlean's specialized cleaning crew went to work. The crew carefully covered the Green Bean Warehouse equipment. They utilized boom/man lifts to gain safe access to the ceiling. Using self contained industrial vacuums they cleaned the entire ceiling, all walls and attached fixtures. The warehouse workers and the Americlean crew worked in tandem to move equipment and product to accommodate the cleaning process. Bill, who was under some time constraints, said "The cleaning crew worked diligently and had the job completed sooner then expected. They were excellent and everything went very well. Bill, seen above with some Americlean crew members, stated "Americlean is our first choice and I would highly recommend them to anyone because of their professionalism, motivated workforce and the value they bring with everything they do."

CHALLENGE

Cleaning the entire inside of a working warehouse without disrupting the flow of work.

SOLUTION

A dedicated cleaning crew using self containment cleaning systems and working in tandem with warehouse workers

RESULTS

A extremely clean raw coffee bean warehouse without any disruption in producing one of our most favorite beverages

Commercial and Industrial Services Include:

Painting / Cleaning / Pressure Washing / Kitchen Exhaust System Cleaning / Epoxy Floors / HVAC Duct Cleaning
