**Huck Finn
Warehouse & More
Grows
with Americlean**

When Edwin Sperber, chief executive officer of Huck Finn's Warehouse & More, decided to convert the former 245,000-square-foot storage warehouse into a retail store, he did not hesitate to call Americlean.

Americlean's team of industrial cleaners went to work and thoroughly cleaned the interior and exterior of the facility. We used a combination of pressure washing technology, heavy-duty industrial vacuuming and elbow grease. The company's Painting Division then took over, sprucing up the walls and ceiling and applying epoxy flooring in time for the warehouse's grand opening.

Huck Finn's Warehouse & More is a very popular store which stocks everything from furniture, bedding and carpeting to house-wares and storage containers.

"They've done a very nice job" says Sperber, "They're dependable and thorough. I've been very pleased". Based on this positive experience, he knew exactly who to call when he decided to expand the warehouse by 35,000 square-feet.

Americlean's owner and founder Mark Miller says "Building relationships with our clients, like the one we have with Huck Finn, is key to Americlean's success.

"Ed's growing, we're helping him, and we're growing, too!"

CHALLENGE	SOLUTION	RESULTS
Renovating a 245,000 sq. ft. warehouse for retail use	Extensive interior and exterior cleaning of warehouse Painting of all surfaces Application of epoxy flooring throughout	The warehouse was converted to the area's largest retail outlet with eight separate zones of products to shop in
